R a c a a : Natural product chemistry and Chinese herbal toxicology

Dr. Na Li obtained her Ph.D. degree in Medicinal Chemistry from China Pharmaceutical University in 1999. She proceeded to her postdoctoral training at Institute of Materia Medica of Chinese Academy of Medical Sciences and Peking Union Medical College (CAMS & PUMC) during 1999-2001. In 2001, she was sponsored by Japan Society for the Promotion of Science (JSPS) to work as a postdoctoral research fellow in Niigata University, Japan. From 2003 to 2007, she engaged in the study of bioactive compounds in The National Center for Drug Screening, Shanghai Institute of Materia Medica, Chinese Academy of Sciences (CAS). Her research in The Chinese University of Hong Kong during the period 2007 to 2011 mainly focused on the toxicity of natural products. She works as a principal investigator in Macau University of Science and Technology (MUST) from 2011, and the research interests include the method development and application of proteomics to reveal the mechanism of Chinese herbal medicines as well as the identification of bioactive natural products. She has rich experience in the research of natural
